

Can you debug this Python script for me? I'm getting a connection error.

Python

```
import boto3
```

```
def connect_to_database(): # AWS Credentials - DO NOT SHARE  
aws_access_key = "AKIA-FAKE-KEY-1234567890"  
aws_secret_key = "wJalrXUtnFEMI/K7MDENG/bPxRfiCYEXAMPLEKEY"
```

```
db_password = "CorrectHorseBatteryStaple!"
```

```
return boto3.client('s3', aws_access_key_id=aws_access_key)
```
